The Beauty of Perfect Control

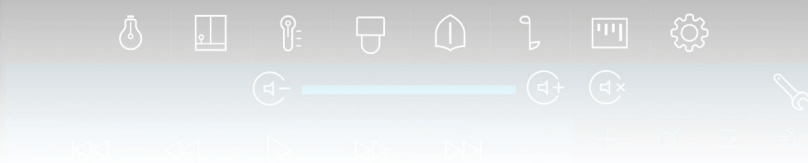

Elegant home automation technology
tailored to your lifestyle

Intelligent home control has never been more beautiful

From the moment you wake to when your head hits the pillow, Crestron Pyng™ makes your lifestyle more comfortable, convenient, and entertaining. With just a tap of the gorgeous app on your iPad®, iPhone®, or touch screen, your home springs to life to give you precise control of everything. Shades rise silently to welcome the morning sun. The lights under your cabinets turn on as you enter the kitchen. Your favorite streaming music station follows you from room to room.

Any Crestron technology can be added to Pyng

Access all of your music from
anywhere in your home

Control lights individually
or with custom scenes

Control individual shades
or group shades

Set the temperature, and set schedules for your thermostat

Lock/unlock doors with a tap

Arm the security system as you leave

Set the scene with Pyng

Pyng gives you the power to personalize your home automation experience with **scenes**. Instead of controlling your lights, shades, audio, and other devices individually, each scene is a set of coordinated system actions that happen at the touch of a button, when you enter a room, or at a set time. With Pyng, you can easily adjust existing scenes or create new scenes in minutes, so your home fits your lifestyle to perfection.

Good Morning

Why wake to an alarm or jolt of music when your shades can automatically start to slowly rise to let in the morning sun? While that is happening, Pyng makes sure the temperature is to your liking and your outdoor lights are all switched off.

Dinner Party

Soft lighting and your favorite playlist create the perfect ambiance for a romantic dinner for two or a lively feast with family and friends. Press one button to set the scene for great meals and beautiful memories.

Welcome Home

Never return to a dark and stuffy home again. With just a tap of your smart phone or Apple Watch™, landscape lights illuminate a path to your front door. Inside, Pyng raises the shades, turns up the lights, and adjusts the temperature to 74°.

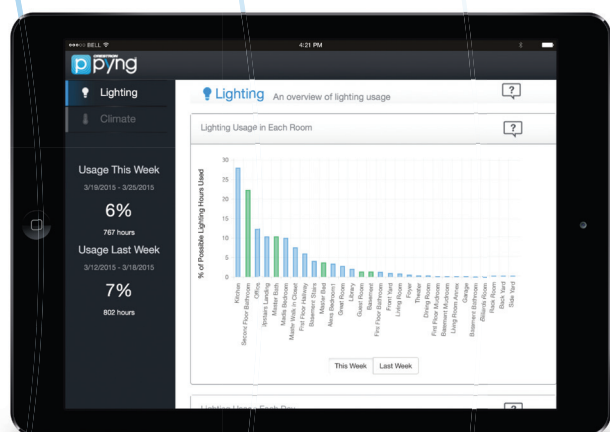

Good Night

Are all the lights off? Are all the doors locked? What about the outdoor lights? Instead of getting out of bed to check, just have Pyng set the alarm and make sure your home is ready for a great night's sleep.

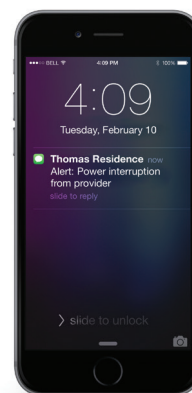

Enrich your home with Pyng Control

Crestron Pyng seamlessly blends into your daily routine, whether you're at home or away, so you stay connected to what's most important. All the technology in your home works together intelligently, for effortless control that enhances the beauty and ease of every room. Contact a dealer today to learn more about the smartest and most user-friendly home automation solution ever, Crestron Pyng.

The ultimate learning system

Pyng makes your smart home even smarter by learning how you use technology and enabling adjustments to save energy and money. For example, if you are leaving lights on in the basement during the day when no one is home, Pyng will let you know. Adding an inexpensive Crestron occupancy sensor to the basement would automatically turn off the light when the space is not in use. Now that's smart!

State-of-the-art peace of mind

To ensure your home is always working flawlessly, Crestron Pyng can be securely connected with the myCrestron cloud for 24/7 system monitoring. The performance status of all the technology in your home is validated on a regular basis. In the event an issue arises at your home, an alert is automatically sent to your Crestron dealer to make sure it is resolved immediately.

Installation and set up designed for busy homeowners

With Crestron Pyng, you can start enjoying the world's most respected and reliable home automation technology in a fraction of the time it takes to install and program other brands. Your dealer can have Crestron Pyng running perfectly in no time using an iPad and our powerful cloud-based set up tools. And with just a few minutes of training, anyone in your home can learn to make changes to Pyng without any fear of damaging the system.

Crestron — A heritage of performance and reliability

For over 40 years, Crestron has been the leading innovator in home automation and control. Our solutions are renowned for ultra-reliable performance and trusted in fine homes around the world. Everything we make is developed and tested by hundreds of Crestron engineers and supported by our truly world class customer service team. We only have one goal at Crestron: your total satisfaction.
